OW 1604 - Guideline review and development – Dropped objects

G+ Global Offshore Wind Health & Safety Organisation

Progress

Report and presentation made to G+ Focal Group on G+ incident data analysis and suitability of DROPs by DNVGL

Workshop held with supply chain on appropriate way forward

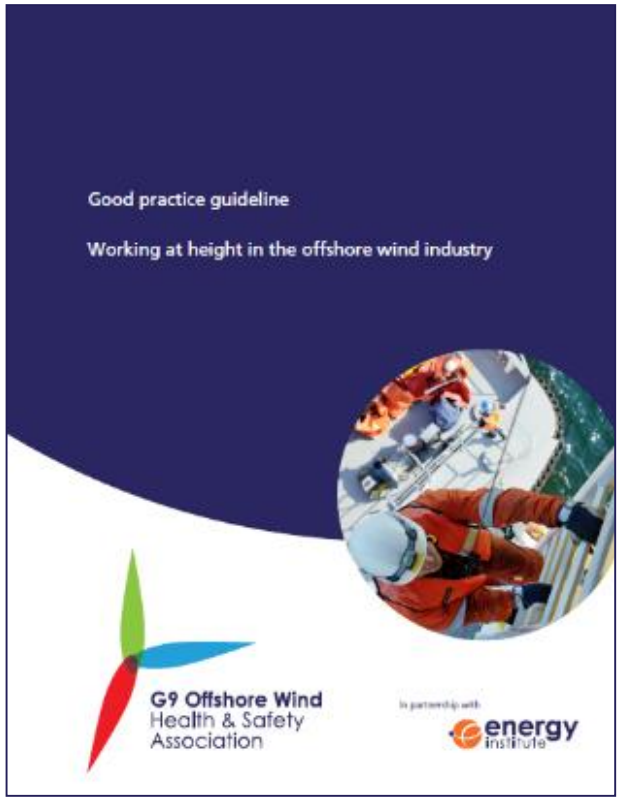
G+ now a member of DROPs, as are increasing number of OWF supply chain.

What's next

OW 1605 - Update of G+ good practice guideline – working at height

G+ Global Offshore Wind Health & Safety Organisation

2014



2018

OW 1602 - Reducing manual handling & ergonomics related incidents in the OWF industry

G+ Global Offshore Wind Health & Safety Organisation

Goal: To develop a manual handling and ergonomics guidance document

Progress

Kick off meeting held with contractor

Background info. collected by contractor

G+ incident data analysed

Draft guidance workshop to be held

What's next

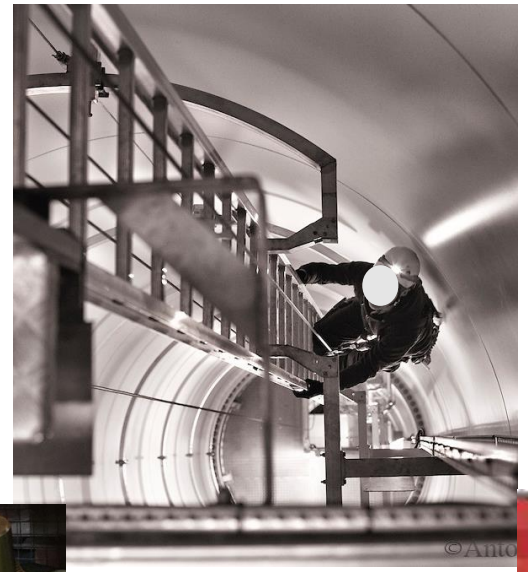
Draft guidance issued for internal G+ review

OW1601 Ladder climbing research report

G+ Global Offshore Wind Health & Safety Organisation

An investigation into the long term effects of ladder climbing on offshore wind technicians

UNIVERSITY OF PORTSMOUTH



Safe by Design

G+ Global Offshore Wind
Health & Safety
Organisation

- A series of guidance documents published on the G+ website to stimulate new thinking amongst the industry developers in designing for H&S
- To share ideas across industry in designing for H&S and to potentially reduce the risk of serious injury and ill health in the industry.

Adoption of Safety Champions

G+ Global Offshore Wind
Health & Safety
Organisation

- Statoil initiative copied by G+
- Meetings held – campaign material, H&S statement, contacts made
- Supply chain involvement
