

## G9 Offshore Wind Health & Safety Association

**Stakeholder Forum  
02 December 2014**

Benj Sykes  
Head of Asset Management, DONG Energy  
Chairman, G9 Board of Directors

---

---

---

---

---

---

---

---

---

---

---

## *Evacuation procedures*

**FIRE**

In the event of a fire, smoke detectors will trigger the fire alarm.  
The House Alarm Panel is linked to the London Fire Brigade who will attend automatically.

If you hear the siren sounding, please immediately evacuate the building via the nearest available fire exit route.

The Assembly point for visitors is on the corner of John Adam Street and Robert Street which is to the right hand side of the Adelphi Building.

**DO NOT** use the lifts in the event of an evacuation.  
**DO NOT** collect your belongings

## *Why the G9?*

www.g9offshorewind.com

---

---

---

---

---

---

---

---

---

---

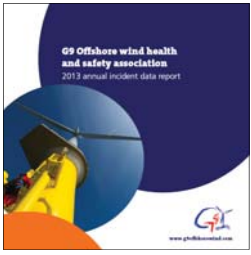

---

### Driven by the statistics

2013	
Fatalities	0
Lost work day	66
restricted work day cases	12
medical treatment case	30
LTIF	2.81
TRIF	4.61

2014 Q1-Q3	
Fatalities	0
Lost work day	34
restricted work day cases	6
medical treatment case	62
LTIF	1.83
TRIF	5.50

---

---

---

---

---

---

---

---

---

---

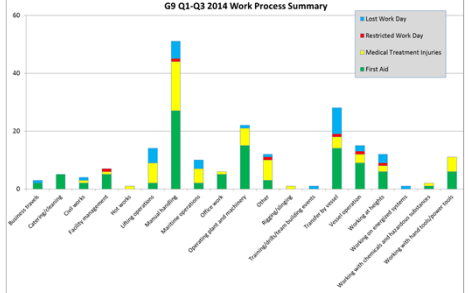

---

---

### Where are the incidents?

G9 Q1-Q3 2014 Work Process Summary

Note – "near hit" and "hazard" data not included in graph

www.g9offshorewind.com

---

---

---

---

---

---

---

---

---

---

---

---

### The complete picture

- The G9 is now the recognised authority for offshore wind HSE statistics
- The Crown Estate has asked the G9 to collect and analyses HSE data from UK R3 Developers

---

---

---

---

---

---

---

---

---

---

---

---

**The purpose of today** 

Good practice guideline  
The safe management of vessel service vessels used in the offshore wind industry

Good practice guideline  
Working at height in the offshore wind industry

www.g9offshorewind.com

---

---

---

---

---

---

---

---

---

---

**The purpose of today** 

- We want you to use these guidelines
- Two panel sessions focussing giving opportunity for you to discuss next steps / implementation of these good practice guidelines

www.g9offshorewind.com

---

---

---

---

---

---

---

---

---

---

**The purpose of today** 

- What about Lifting Operations?
  - Based on feedback received through the consultation and an assessment within the G9, we will not be producing a GPG on Lifting Operations
  - However, lifting incidents are still occurring, despite good quality guidance already being available
  - Final panel session – what do we need to do to reduce the number of lifting incidents occurring?

---

---

---

---

---

---

---

---

---

---

### ***The purpose of today***

- The G9 ambition is very simple...

***We want to work collaboratively with all stakeholders to make this industry safer***

***We aim to be the leading authority on HSE for the offshore wind industry***

www.g9offshorewind.com

---

---

---

---

---

---

---

---

### ***A final point on membership***

www.g9offshorewind.com

---

---

---

---

---

---

---

---

### ***Concluding points***

- We all share the same aim of making the industry safer
- Our Good Practice Guidelines are an important tool in realising this aim
- This is the start of the journey to implement what we have developed
