G+ Global Offshore Wind Health & Safety Organisation

2015: G9 leadership role

[extract from HSE offshore wind leaders event report, Bootle, 26 Nov 2015]

"G9 Offshore Wind Health and Safety Association would further improve industry leadership and specifically:

 Consider how to improve engagement through the supply chain to ensure it is fully involved;

Recognise need to create a common, risk-based agenda for the sector

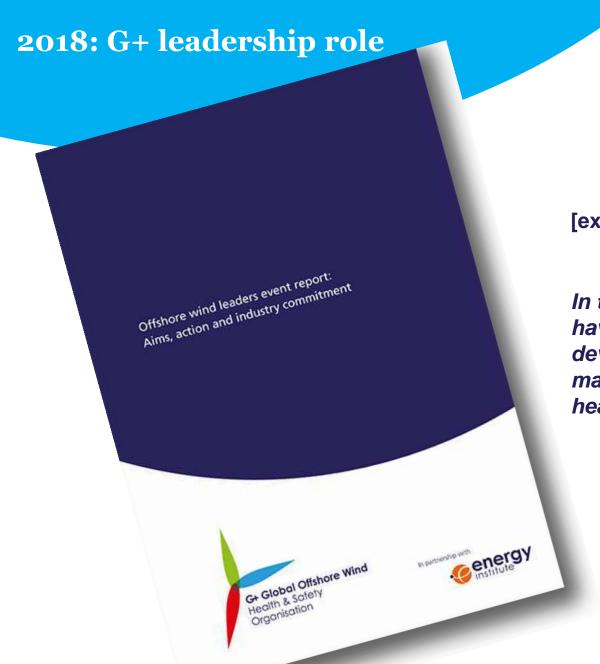

Actively engage with all relevant stakeholders including trade associations and others

Drive the development and proper and consistent implementation of good practice

Identify quick wins to provide momentum for further change

Report back on progress by April 2016"

[extract from HSE offshore wind leaders event Bootle, 2018

In the three years since that meeting, we believe that you have made good progress in showing leadership in the development of industry guidance, which puts risk management and best practice in health and safety at the heart of the guidance.

Martin Temple (HSE)- 2018 Bootle

Who are the members of G+?

Associate Members

Overview of G+ member sites

Is G+ solely responsible for setting the H&S agenda for the industry?

Themes and objectives for the day:

Further steps in Leadership

- How can G+ continue to provide effective leadership for the industry?
- Given further afield operations, what are the new challenges and risks.
 SOV's, Heliops?
- What activities should we be planning for?

We also need to consider People

- What is the safety culture in the industry?
- Why companies should invest more in their Safety Culture

Internationalisation – Cooperation - Harmonisation

 What is the role of G+ in harmonisation of H&S ways in current and new markets?
