

RECALL OF NEWTON, NEWTON FAST, AND NEWTON EASYFIT HARNESSES - EUROPEAN VERSIONS

Dear customer,

You purchased a Petzl harness from the range of **NEWTON European Version harnesses**, manufactured in **2022**, some of which are affected by this recall.

Petzl is recalling these harnesses due to a non-conforming batch of FAST LT buckles that could lead to a fatal fall. Only certain harnesses from the NEWTON European Version range, manufactured in 2022, are affected by this recall.

We ask that you:

1. Immediately stop all use and sale of harnesses in the **NEWTON European Version range**
2. Read the **Safety Alert** below to determine whether your harness is affected by this recall.

RECALL

3. If you're a reseller: Immediately relay this recall, directly and personally, at a minimum in writing, to all customers that ordered harnesses affected by this recall.

Additionally, we encourage you to share this recall more widely via your website, social media, contact database, posters in your store, etc.

Once these actions are completed, you can return to selling and/or using harnesses in the NEWTON European Version range that are not affected by this recall.

Please accept our sincere apologies for the inconvenience. The Petzl after-sales team is available and ready to help manage this recall.

Best regards,
Petzl Customer Service
